

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee. I cannot afford this additional fee. I have asthma, severe and when I'm out my phone gives me security in knowing I can reach 911 at any time if I should have problems. It is unfair to force more "good funds" to come from us who can barely afford our medicines, let alone the trash you want us to pay for too. Please don't do this great wrong to us!

Keep the USF Fair!

Sincerely,

Jennifer Hess
